## ELECTRICAL ENGINEERING & LIGHTING DESIGN

Barbara Morse Wackford Aquatic Complex

Brisbane Community Swim Center

Finley Park Swim Center

### FIRM PROFILE AND RELEVANT EXPERIENCE

O'Mahony & Myer is a 25-person electrical engineering and lighting design firm based in San Rafael, California. Founded in 1979, the firm provides full service electrical engineering and lighting design services to architects, engineers, interior designers and building owners and specializes in commercial, civic, educational and institutional facilities. O'Mahony & Myer has designed the electrical and/or lighting systems for over 70 community centers in and around the Bay Area, with many of them being full-fledged aquatic centers, while many others have at least some level of swimming facilities. We are adept at managing the deck-side and site lighting required of community centers where light pollution and light spill can be major concerns for the surrounding neighborhood. In addition to our experience with aquatic facilities, we have extensive experience designing in-center gymnasiums, computer labs, multi-use rooms, lunch room/kitchen facilities, ball fields, and other amenities found in modern community centers. The following is a select list of aquatic centers and multi-use recreation centers for which we provided electrical engineering and/or lighting design services.

### COMMUNITY AQUATIC AND RECREATION CENTERS
