ELECTRICAL ENGINEERING & LIGHTING DESIGN

Angel Island Historic Facilities

Kelso Depot National Park

Presidio Funston Bldg #5

Burlingame Historic Public Library

FIRM PROFILE AND RELEVANT EXPERIENCE

O'Mahony & Myer is a consulting engineering firm specializing in electrical engineering and lighting design for civic, industrial, educational, institutional, and commercial projects. Founded in 1979, O'Mahony & Myer provides full service electrical engineering and lighting design services to architects, engineers, interior designers and building owners. The firm has considerable experience in the preservation, restoration, renovation and remodeling of historical buildings and facilities. This includes not only upgrading antiquated electrical infrastructure, but also designing lighting systems and controls that provide all the benefits of modern illumination technology, while maintaining the historical integrity of the building and preserving the period look and feel of the fixtures and appointments.

Angel Island Barracks Historic Restoration, San Francisco Bay, CA

This historic facility was completely restored and converted into a new National Park Visitor Center and Museum. O'Mahony & Myer was retained to provide full electrical engineering and lighting design services for all interior and exterior areas of the project, including provision of new utility services to the facility and museum-grade illumination systems for the interior exhibits.

Kelso Depot National Park Historic Restoration, Mojave Desert, CA

O'Mahony & Myer provided complete electrical engineering and lighting design for the complete rehabilitation of this historic railroad station into a museum and visitor center, housing numerous period railroad displays and a full-service café. The facility was provided with all new utility services, security and fire alarm systems, tel/data systems and period-appropriate exterior and interior lighting. The lighting of all museum displays was included in the project.

Presidio, Funston Bldgs 4, 5 and 6, San Francisco, CA

This project involved converting historic Presidio residential buildings into modern office space. O'Mahony & Myer provided complete electrical engineering and lighting design for the renovation and preservation of the historical look and feel of the Presidio buildings.

Burlingame Library Historic Restoration, Burlingame, CA

This classic community library was originally designed by prominent peninsula architect Colonel Norberg and constructed in the early 1930's. O'Mahony & Myer was retained to provide electrical engineering and lighting design services for the complete reconstruction and expansion of this popular facility. The lighting for this project was deemed to be critical to the overall success of the Architect's "historic" scheme, and was carefully designed by our lighting design studio to both augment the period architectural design as well as provide the high levels and quality of light so necessary in a modern Library facility while utilizing energy efficient lamps and ballasts.

O'MAHONY & MYER

ELECTRICAL ENGINEERING & LIGHTING DESIGN

Fong Library, UC Berkeley

Rafael Theater & Film Center

Fong Library Renovation, UC Berkeley, Berkeley, CA

This project involved renovation of several spaces to introduce not just a new finish and look, but more importantly improved and enhanced lighting and technology infrastructure, integrating the Fong Library with the school's Informatics Center, a lecture theater and a computer lab. In addition, the project included a new teaching computer laboratory, student lab space, and the School of Optometry "Hall of Fame."

Rafael Theater and Film Center, San Rafael, CA *Burlingame Historic Public Library*

This historic Downtown San Rafael theater was expanded and completely renovated & modernized as part of the City of San Rafael's aggressive Downtown Rehabilitation Program. Local patron George Lucas donated an impressive array of state of the art theatrical multi-media projection and "THX"-certified surround sound theater equipment, which was incorporated into the Electrical Design for the facility. The new layout provides for three distinctively designed film theaters, each also equipped with new theater-quality lighting and dimming. O'Mahony & Myer provided all electrical engineering services, as well as full architecturally integrated lighting design, including custom refurbishing and modernization of the original Art Deco Chandeliers and matching ceiling fixtures in the original theater and main lobby. Special care was taken to fully coordinate with Lucas' THX engineers to ensure that the theaters will meet the most stringent motion picture presentation requirements well into the next millennium.
